

Mr. Scott Russell, President  
Ultravation, Inc.  
212 Ideal Way  
Poultney, Vermont 05764

Dear Mr. Russell:

At the Goddard Schools we strive to provide the best possible learning environments for our students and that includes taking every opportunity to ensure student health. A healthful environment promotes the learning experience and provides piece of mind for parents — who have entrusted us with the well being of their children while they are here.

We have discovered through Ultravation yet another opportunity to enhance the healthfulness of our indoor environment and the Goddard experience through the optimization of the air quality in our buildings. In the six months since the installation of our Ultravation Photronic air purification equipment we are proud to say that we are doing just that: minimizing airborne allergens, bacteria and viruses as well as simply keeping our classrooms cleaner with the reduction of dust that accumulates so readily in active classroom environments.

We have had time to see the results and we are very pleased. We have seen fewer “runny noses”, coughs and sneezes spreading around. The systems are working flawlessly with their filtration constantly cleaning the air and their UV light disinfecting it. Further, the odor reduction is quite noticeable — not that our classrooms smell different, in fact, it is the absence of some of the characteristic building smells that give our school a sense of welcome.

We have also seen the difference that consistently clean HVAC coils can make — they look so much better — and we are looking forward to the energy savings the higher efficiency cooling coils will bring. We’d like to thank you for all your assistance in helping us create our IAQ solution. We have had very positive results and have received appreciative comments from the parents that have become aware of our IAQ initiative. It is clear that your products are well designed and do the job as advertised.

Sincerely,

Jim Nerpouni  
Owner
