

UltraMAX™ EZUV™

Whole House Germicidal UV Air and Surface Treatment

Improve
your
Indoor Air
Quality!

So everyone breathes easier!

- Kills Airborne Bacteria and Viruses
 - Controls Mold
 - Reduces Allergens
 - Deodorizes
 - 24VAC Powered
 - UV Shield/Focuser included
 - Keeps HVAC Systems Cleaner
- Increasing HVAC Efficiency—Saving Energy!**

Ultravation®

Professional Indoor Air Quality Products

Indoor air as healthy
as the great outdoors™

There is an Ultravation® HVAC IAQ system for every needed level of performance

UltraMAX™

UltraMAX™ GOLD™

No UV system has more UV capability! Maximum UV output intensity plus electronic monitoring for operation and UV lamp life. Shown with optional UV Focuser/Shield, single 12" T3™ UV lamp.

UltraMAX™ UME™

For maximum UV effectiveness at the lowest possible cost. Shown with two 17" T3™ UV lamps.

UVPhotoMAX™

Germicidal air treatment with high performance odor control. Decomposes hundreds of household odors caused by volatile organic compounds (VOCs). Pet smells, cooking smells and odors from cleaning and renovation activities, are all broken down using an advanced oxidation process. Add an EZ-Light™ to remove mold from HVAC coils and components.

Photronic™

Treat all three major indoor air pollution sources! Includes UltraMAX™ germicidal UV air treatment, ProgressiveMedia™ hypo-allergenic air filtration, and ReFresh™ photocatalytic odor reduction system. Models to fit anywhere a media air cleaner would be placed in your central HVAC system.

Available from...

We recommend that UV equipment be installed by HVAC professionals who are trained in UV systems, and how to determine optimum lamp placement.

Manufactured in USA by Ultravation

Do you have these problems or concerns...

- **Odors?** (Dirty sock and musty-moldy smells)
- **Allergies?**
- **Air conditioning components clogged with bio-growth?**
- **Airborne mold?**
- **Algae growth inside of air conditioning system?**

UV offers a real solution!

Ultraviolet light reduces or eliminates harmful mold, bacteria and airborne pathogens—in a fraction of a second! Ultravation patented technology ensures optimum performance, regardless of the severity of the problem.

UltraMAX™ EZUV™

Whole House Germicidal UV Air and Surface Treatment

UltraMAX™ UV destroys airborne germs to reduce the spread of colds and other illnesses transmitted through the air. Allergy sufferers enjoy relief because UltraMAX™ kills mold and mildew on the wet surfaces inside HVAC equipment — and keeps them clean — eliminating a major source of airborne allergens (especially mold spores) and musty odors inside your home. An UltraMAX™ EZUV™ air treatment system is an economical yet effective way to automatically “clear the air” of unwanted germs, allergens and odors.

- **Low voltage (24VAC)—No electrical outlet required. Connects to any 24VAC HVAC transformer.**
- **Install in new HVAC systems to keep them running like new.**
- **Install in problematic HVAC systems to reduce biological contamination and make the air healthier.**

Ultraviolet light (UVC) is germicidal and will control surface and airborne...

How UV works

UV rays breakdown bacteria, virus, mold and mildew DNA, rendering the microbes harmless.

UltraMAX™ EZUV™ kit includes

- Mounting brackets and wiring
- UV status lens
- Patented UV lamp safety interlock system
- Premium UVC Lamp (12" or 17" length)
- 24VAC power supply (18-32 VAC range)
- UV Shield / Focuser

Installs directly in your heating and air conditioning system. *Note: We recommend that UV equipment be installed by HVAC professionals who are trained in UV systems and to determine optimum lamp placement.*

Installation location options

Costs only pennies a day to operate—no more than a

small fluorescent lamp. A clean HVAC coil can save more energy through increased HVAC efficiency, than the EZUV uses to keep the coil clean!

It protects your family from high concentrations of airborne germs, viruses and allergens...

UltraMAX EZUV™ ultraviolet air treatment is specially designed to harness the power of UV light to create healthier indoor air. It literally destroys airborne viruses, bacteria and allergens while it keeps the interior surfaces of your HVAC system free of mold and other biogrowth. This means you'll have a cleaner, more efficient HVAC system, that *uses less energy!* And, EZUV can reduce—often eliminate—expensive *chemical* coil cleanings. So you'll save energy and cleaning expenses while improving the environment!

We are indoor air quality specialists!

Ultravation is a leading manufacturer of indoor air quality products, with over thirty years of ultraviolet expertise. For more information on Ultravation indoor air improvement products visit ultravation.com. Remember, if it does not say Ultravation on the label you are not getting the most value for your investment!

Learn more at Ultravation.com

Works for you 24/7, silently and unobtrusively, operating out of the way in your heating and air conditioning system. Nearly maintenance free: Simply replace the UV lamp just once a year as part of your annual HVAC service!
