UltraMAX Gold

The Ultimate in Whole House Germicidal UV Air Treatment

Treats airborne germs, allergens and mold for a healthier, fresher indoor environment

UMX1202T with T3™ Remote UV Lamp System
Studies have confirmed that an unintended result of today’s advanced construction techniques for tighter more energy efficient structures, is indoor air can contain pollution that rise to levels that far exceed outdoor air, even 100 times more polluted!

Ultravation is dedicated to developing new ways to control indoor air contamination. Illness causing microorganism infestation, allergens and bad odors caused by VOCs* are all problems that can significantly affect the well being and comfort of every member of the household.

We are specialists in manufacturing products that help you effectively manage and optimize indoor air quality. Our products are the result of studying the sources and causes of indoor air contamination, and combining proven techniques and new technologies to reduce it simply and effectively.

Ultravation® UltraMAX™ is the result of many years of UV disinfection experience—designed to achieve new heights of effectiveness and health benefits. Our high performance UV lamp systems, microprocessor control and elegant single circuit board design has made UltraMAX the state-of-the-art in UV treatment. With the ultimate in UV performance achieved, we then combined UltraMAX with Refresh™, our UV powered odor reduction system that uses photocatalytic technology to decompose odors, as well as other health-impacting biological air contamination.

*VOCs: Volatile Organic Compounds make up hundreds of household odors that are generated from common activities like cooking, cleaning and home improvement projects.

Complete the process of creating the ultimate in home comfort by optimizing air quality.
An UltraMAX™ Gold UV system brings the power of sunlight indoors... to naturally fight airborne bacteria, viruses, allergens—and odors!

**Refresh™**

Whole House Odor Reduction

Ultravation® Refresh™ adds a completely new dimension to UV air treatment. UltraMAX™ goes beyond high performance germicidal action to also clear the air of hundreds of household odors caused by VOC’s. Ultravation’s proprietary formulation for catalytic oxidation—powered by UV—allows UltraMAX™ to decompose odors in a process similar to that of a pollution reducing automotive catalytic converter. The Refresh™ system converts bad odors to harmless, odorless components!

Add UltraMAX™ Gold to your heating and air conditioning system for...

- Dramatic reduction of airborne bacteria, viruses and allergens for your entire home.
- Keeping your home smelling fresher by reducing hundreds of odors caused by VOC’s.
- Saving energy! It keeps the insulating effect of biological growth of air conditioning surfaces.
- Peace of Mind: the UltraMAX™ UVLampMonitor shows system status at a glance—including when to change lamps to maintain optimum air disinfection!

UltraMAX™ is silent and virtually maintenance free

Professional grade and installed out of the way in the heating/air conditioning system, UltraMAX™ does its job without the compromise of adding noisy or intrusive air cleaning appliances in any room. Only requires lamp changes at up to two-year intervals.
Ultraviolet air treatment is the safe, easy and reliable way to create healthier air for your home

• The Science of Ultraviolet™
  How ultraviolet light kills germs
  The “C” band of ultraviolet light (UV-C) is a natural disinfectant and is a component of sunlight. It penetrates and disrupts the DNA of microorganisms, rendering them harmless. This is nature’s way of controlling airborne bacteria and viruses outdoors. UltraMAX™ “shines” UV light with much more intensity than occurs outside, inside the heating and air conditioning system to control both airborne microorganisms and biogrowth on the often moist interior surfaces.

• Putting more science to work for you, the UltraMAX™ Refresh™ helps your home smell fresh using photocatalytic oxidation
  The Ultravation® Photocatalyst Odor Reduction system, is powered by UV and uses our proprietary titanium dioxide compound to chemically breakdown VOC* odors. Working a lot like the catalytic converter in your car, the module breaks down odors, from all kinds of sources—from cooking to cleaning, pets, even home improvement projects like new carpet and paint odor. The Refresh™ module requires no maintenance or scheduled replacement.

*VOCs: Volatile Organic Compounds. These are airborne irritants released from hundreds of sources. Odors from cigarette smoke, paint, new carpet, pesticides, cooking smoke, cleaning solvents, even dry cleaned items are included to name only a few. You can view a more comprehensive list at www.epa.gov/iaq.voc.html or at www.ultravation.com/vocs.html
Only UltraMAX™ Gold offers these extraordinary performance features

- **Ultravation’s T3™ remote UV lamp system gives you up to 50% more germ killing UV intensity!**
  Ultravation® T3™ is a patented® lamp system that maximizes performance, safety and economy! T3™ thermal optimizing for operation in the cold air enhances UV intensity. T3™ has a unique interlock that safely turns off UV before lamp removal. The result is that you’ll enjoy a well engineered system that delivers extraordinary effectiveness—with the energy cost of an everyday light bulb!

- **The UltraMAX™ GOLD integrated design is engineered to maximize disinfection performance**
  From power supply to lamps, each component in UltraMAX Gold is optimized to work as one integrated system to produce the most UV germicidal power possible.

- **The heart of UltraMAX™ is the ESPII Electronic Power Supply with UVLampMonitor**
  High efficiency lamp power with microprocessor optimizes germicidal action, lamp life—even tells you when to change lamps for optimized airstream disinfection.

There is an UltraMAX™ to fit your heating and ventilation system...

**UltraMAX™ with Ultravation® T3™ Remote-mount UV Lamps**
- UMX1200T One 12” T3™ remotely installed UV lamp
- UMX1202T Two 12” T3™ remotely installed UV lamps
- UMX1900T One 17” T3™ remotely installed UV lamp
- UMX1902T Two 17” T3™ remotely installed UV lamps

**UltraMAX™ with U-Shaped Integrated UV Lamps**
- UMX1000 One 9” integrated U-shaped UV lamp
- UMX2000 Two 9” integrated U-shaped UV lamps
- UMX1036 One 16” integrated U-shaped UV lamp
- UMX2036 Two 16” integrated U-shaped UV lamps

**Which UltraMAX™ system is right for you?**
Your heating and air conditioning contractor can help you decide which UltraMAX™ set-up will work best—based on goals such as mold reduction, the size of your home and your particular HVAC system’s characteristics.

We recommend professional installation for most effective performance.

Indoor air as healthy as the great outdoors™
Looking for quality air filtration?
Add to the disinfection power of UltraMAX with...

**Photronic™**

The Whole House
Air Purification System

Germicidal UV, Premium Filtration and Odor Treatment in one integrated system

**Stage 1**
High efficiency MERV 11 performance particle capture

**Stage 2**
Refresh™ Air cleansing for odors and biological contaminant destruction

**Stage 3**
UltraMAX Germicidal treatment directly destroys bacteria, viruses, mold and other allergens

Photronic™ is a comprehensive, Multistage™ multi-technology air purification system designed to treat indoor air pollutants of all kinds!

Available to fit any HVAC system …

**Ultravation® ProgressiveMedia Whole House Air Filtration**

Ultravation Whole house air cleaners use special layered media construction that provides MERV 11 performance with excellent dirt holding capacity. Each filter* is constructed using 32 sq. ft. of ProgressiveMedia™ formed into pleats, resulting in a very long filter life and an extended period of very high efficiency air cleaning. * Any Ultravation 20” x 25” x 5” model

**Add HEPA Air Cleaning for the Whole House**
Provides true HEPA performance without causing a drop in air flow!
